Education

Lehigh University Fall 2026
Exchange semester · Bethlehem, PA

INSA Lyon 2022 – 2027
Engineering Degree in Computer Science (Diplôme d'ingénieur) · GPA 3.9/4.0 · Graduating Jun 2027
Specialized in Algorithms, Machine Learning, Agentic AI

Experience

Chief Technology Officer May 2026 – Jan 2027
Buddimm · Real-estate consulting company (~10 people)

- Joined as an intern and then hired as CTO. Own the full technical stack: public website, internal tools, and the lead-generation pipeline.
- Lead AI tooling: Claude for Teams company-wide, a custom company MCP for internal tools and data, and ~20 skills based on internal processes. Train the team on effective AI usage. Some tasks now run up to 8 times faster.
- Maintain the public website and its SEO, which increased traffic by nearly 10x in two weeks.

Freelance Software Engineer Jan 2026 – Apr 2026
BOBST · ST-to-C++ toolchain for a production optimizer

- Reimplemented a 25,000 lines industrial optimizer program written in CODESYS Structured Text, without access to its proprietary compiler or a runnable source of truth.
- Built an ST-to-C++ compilation pipeline: source extraction, syntax rewrites, C++17 codegen, and a runtime harness.
- Extended the optimizer so it derived configuration values instead of taking them as manual inputs, considerably speeding up the sale process for these machines.

Cybersecurity consultant Jan 2026
Profundum AI · Security assessment of a live AI SaaS platform

- Produced a full security audit of an AI chatbot web platform.
- Identified multiple severe issues, notably in the subscription system.
- Performed a second audit on security and good practices for the LLM chat pipeline (prompt injection, tool abuse, data integrity).

Research Intern Summer 2025
Suwa University of Science, Nagano, Japan · Behavioral changes induced by Virtual Reality

- Designed and ran Unity-based VR experiments, then analyzed participant data to study behavioral changes in immersive environments.

Research Intern Apr 2024
Northwestern Polytechnical University, Xi'an, China · CAD and fabrication of carbon fiber aircraft

- Used computer tools for designing and manufacturing carbon fiber-reinforced composite laminated aircraft.
- Studied CAD and fabrication techniques for composite materials in aerospace.

Competitive programming

- **ICPC Europe Championship 2026** (Warsaw): 2nd in France, 40th / 53.
- **ICPC SWERC 2025:** 3rd in France, 18th / 142.
- **Prologin:** 4-time finalist (2022 – 2025).
- **Castor Informatique 2020:** 1st / 500,000+.
- **Match'Up 2022:** 1st / 2,000+. Problem setter for the last two editions of this contest.

Projects

C compiler (C++) | *github.com/WiredMind2/C-Compiler*

- Built a compiler for a C subset, from ANTLR4 parsing through typed three-address IR/CFG and x86-64 and ARM64 back ends.
- Implemented semantic analysis for types, pointers, arrays, implicit conversions, and invalid-program diagnostics.
- Added seven optimization passes and differential testing against GCC across valid and intentionally rejected programs.

Trading backtester (Python) | *github.com/WiredMind2/OpenTrade*

- Built news sentiment analysis with LightGBM models for multi-horizon price prediction.
- Built an intraday backtesting engine with slippage and commission modeling.
- Implemented and tested multiple trading strategies such as MACD, LightGBM, RL, and pairs trading.

Streaming platform (Python) | *github.com/WiredMind2/AnimeManager*

- Built a multi-platform app for searching, downloading, and watching series: metadata from multiple providers API and built-in media players, with a shared backend behind desktop and web clients.

Leadership

INSA Lyon student associations 2023 – 2025

- Served as President of the Algorithmics Club (INSAlgo, 2025).
- Served as Vice-President of the CS students association (AEDI, 2025).
- Served as Treasurer at INSAlgo (2024) and ADT (2023).

Skills

Programming: Strong in Python, C++, TS/JS. I've also worked with: Prolog, C#, Java, PHP, Kotlin, Rust, Swift, Ruby
Tools: Linux, Git, Docker, Database (MySQL, SQLite, Postgres, Firebase), Apache, Nginx
Languages: French (native), Creole (native), English (C2), German (B2), Japanese (JLPT N4)
